

ServicePRO-OnLine Pest Control Software Bar Coding solution is the leader in hand held solution for today's professional Pest Management Industry. Our Bar Coding solutions are used in the HACCP industry and across other industries.

ServicePRO-OnLine Bar Coding Software allows the commercial and domestic focused pest management professionals to provide their customers the latest in hand held technology. From Bar Coding monitoring devices to reporting, ServicePRO Software Barcode Software quickly and easily handles the electronic capture of information.

The hand held provides the field staff the ability to capture and add the following features:

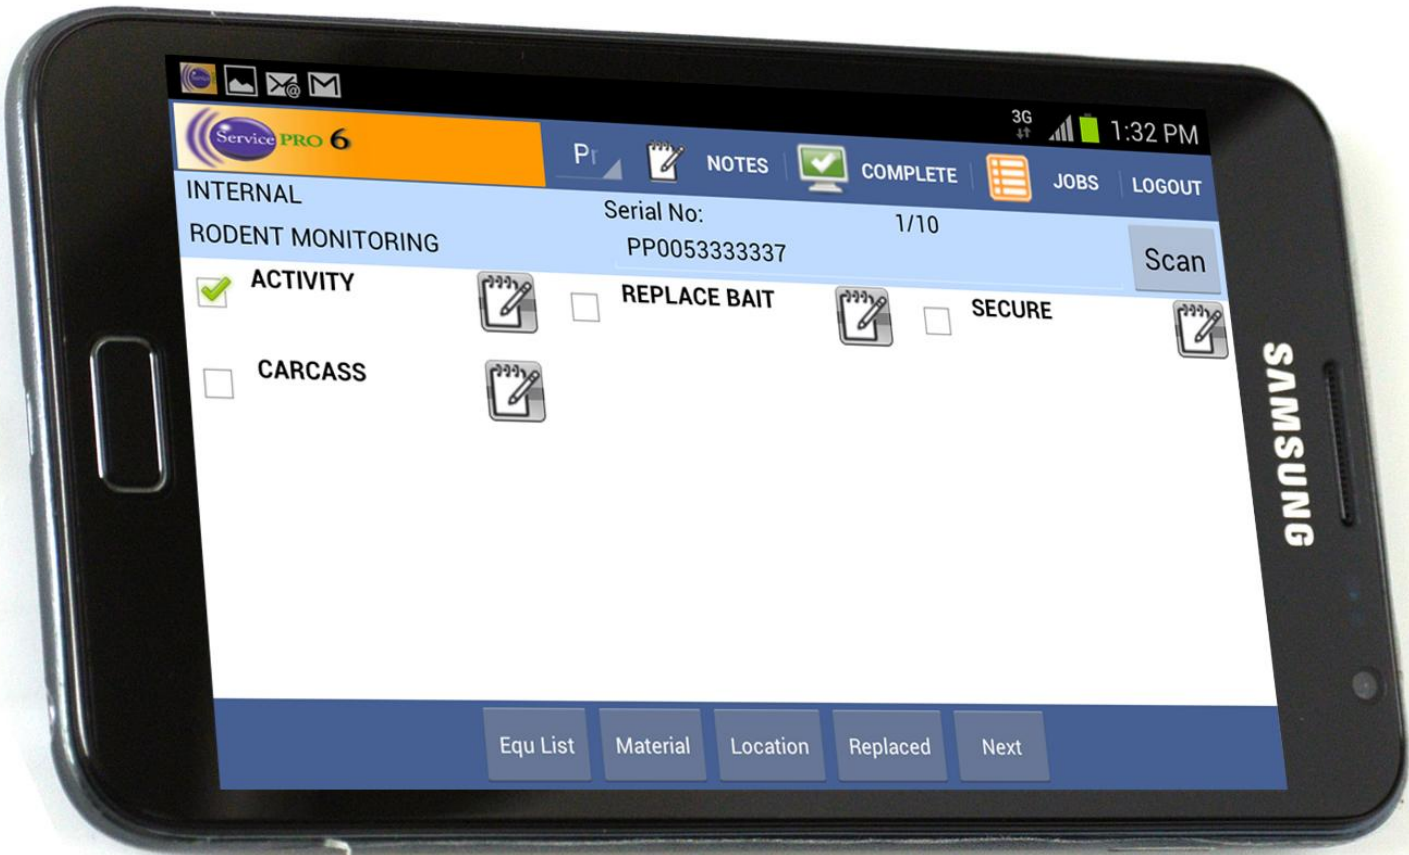

- Date / Time stamp of each service
- Past history of findings for the technicians
- Service to be performed
- Use of type of equipment
- Rodent Stations
- Termite Stations
- Electronic Fly Killers (EFK's)

- Add location of each station
- Record Material usage
- Record the batch number of each material used
- Capture the signature of customer or technician

Trends in the commercial market lend itself to the latest in technology and ServicePRO Software Barcode Software effectively provides this leading edge technology.
